'CNRBiblioAPP' Library services on your smartphone

'CNRBiblioAPP'

CNRBiblio is the APP realized thanks to the financing of the project "BiblioApp: library services on smartphone" - result among the winners (1st place) of the 2015 edition of the "CNR Innovation Award" regarding the thematic area: improvement of internal information flows and external communication channels, in terms of accessibility, transparency, responsibility, image. The goal of the project is to make available, through an APP on your smartphone, all the information, scientific documents and services useful to users, increasingly looking for quick and appropriate answers to their information, training and study needs, work.

Premio per l'Innovazione
Edizione 2015

Description

'CNRBiblio' is the App with which you can consult the catalogue of the CNR Central Library .

The main features of the App are :

- ◇ search for books or other materials, with a text search or quickly by reading the bar code
- ◇ to know the availability of the document
- ◇ request, reserve or extend a loan
- ◇ save your bibliographies in sync with the web portal
- ◇ suggest a purchase
- ◇ view the reader status and the librarian's messages

They are also available :

- ◆ new search and refine search filters through faceted classification: tags, authors, year, material type, nature, etc.

- ◆ social functions for readers that allow sharing titles and notices in the catalogue with social networks
- ◆ notifications of news and events updated in real time
- ◆ ability to send questions to the library by using the "ask a librarian"

The APP is available on the store of Apple and Google searching 'CnrBiblio':
